Finance Committee

Health (Tobacco, Nicotine etc. and Care) (Scotland) Bill

Submission from Stirling Council

Response

- The Regulator Service supports any legislation designed to protect and improve public safety.

- An age restriction enshrined in legislation will assist enforcement agencies to tackle issues.

- Measures to discourage smoking are a good thing, in my opinion. These measures have implications for Nicotine Vapour Products and regulation I feel is helpful as there is not the experience yet of whether there are long-term implications of these products.

- In terms of the workforce I don't anticipate financial impact.
