

## **CITY OF EDINBURGH COUNCIL**

### **WRITTEN SUBMISSION**

We endorse the response submitted by SEStran for the call for views. In addition we would draw attention to the fact that this Council, in support of its' ambitious targets for Active Travel has set aside a percentage of its overall transport budget for investment in and promotion of cycling. The percentage stands at 7% in the current financial year. It's worth noting that Scotland's cities, Edinburgh in particular, have recently been making some significant progress in the share of journeys made by active travel and especially cycling.

**City of Edinburgh Council**
