

Supplementary written evidence from Zero Waste Scotland

Information on Zero Waste Scotland and Scottish Enterprises Loan Fund projects

As requested when I gave evidence to the Committee on 'Resource use and the circular economy' on 14 May, please see below for information about the projects currently being supported by Zero Waste Scotland and Scottish Enterprises with a view to them receiving support via the £3.8M Recycling Loan Fund.

13 projects across Scotland are currently being supported although these projects are still to formally apply for a loan.

These projects are located in the following local authority areas:

- Three projects in North Lanarkshire
- Two projects in Edinburgh
- One project each in Argyll and Bute, Renfrewshire, Glasgow, Dumfries, Perth and Kinross, North Ayrshire, Falkirk and Aberdeenshire.

I trust that this information is useful to the Committee. In addition I would like to offer the opportunity of a follow up meeting to any of the Committee members individually to talk further about the circular economy if such a request was desirable.
