Wild Animals in Travelling Circuses (Scotland) Bill

Written submission from Juliet Stevenson

Please continue with the ban of wild animals in circuses. All animals should be banned worldwide. It is unethical, serves no purpose in their conservation and being made to carry out movements that are unnatural to them is wrong. A life in a transport cage and made to perform for entertainment is no life for these majestic animals.

Please put the ban in place and hopefully the rest of the UK will follow your example. 98% of Scottish people support the ban.

Thank you for your time.
