Inquiry - Article 50

Written submission from George Ewan

I am a retired doctor who worked in the specialty of occupational medicine. I had the pleasure of training and working with doctors from the EU particularly Poland and Germany. These doctors were of high intelligence and ability and provided invaluable service here in the UK. I consider it of the utmost importance to offer such as remain here the rights of citizenship at the earliest juncture. It is also my view that every effort is made to render this traffic in professional exchange between the EU and the UK as open and longstanding as possible in the post Brexit era.
