Lucinda Meyer submission of 11 May 2018

I was physically injured from Lexapro (Escitalopram) and Xanax (Alprazolam). I am disabled in ways that are still hard for me to even grasp. These medications destroy our much needed receptors in our brain. With out them we are unable to function on an human level. The things I have experienced are pure torture and there is no help. People are committing suicide just to make the the pure terror and pain stop. It's inhumane what happens to us. And the doctors do not even recognize that this can and does happen. We are left alone to try to survive this. It has been described as human torture chamber. I am 10 months out from taking these medications (poisons). I was a happy and very productive women. It was given to me for a thyroid condition. And has destroyed my life and my Brian. I have central nervous system damage. Pain like no one should have to live with and akathisia cortisol rushes agoraphobia (never was afraid of anything !). I have not been able to leave my home since. I have lost everything!!! I even lost my ability to speak or walk when this first hit. It's a horrific injury caused by these dangerous drugs. I never abused anything. Took as prescribed!!!! There are people taking there life's because of this. Not because they are crazy. But because the torture is unbearable. I don't know if I am going to survive. Please help us.
