T: 0300 244 4000 E: dfmcscr@gov.scot

Kenneth Gibson MSP Convener Finance and Public Administration Committee The Scottish Parliament Edinburgh **EH99 1SP**

7 September 2022

Dear Kenneth.

UPDATE ON 2022-23 SAVINGS

In Parliament today I will set out the significant financial challenges we face as a result of the current UK cost crisis.

This crisis is unprecedented. Since the advent of devolution, more than 20 years ago, Scotland has not faced a situation that has combined the significant reduction in the Scottish Government's spending power with the massive impact of the cost crisis on households. families, businesses, public services and the third sector.

I will therefore set out to Parliament the steps the Scottish Government has taken and will take in the near term to manage the nation's finances, while taking steps to maximise the support we make available to help those in need.

We are constrained in this task both by the limitations placed on our powers by Westminster and, in particular, by the fixed nature of our budget.

Our budget was based on a UK Spending Review that did not anticipate the levels of inflation that have arisen, and which, according to the Bank of England, will deteriorate further. Our reserve funding is already fully allocated and we have no legal ability to borrow to fund pay costs or further cost of living support within the existing Fiscal Framework rules. We also cannot vary income tax in-year.

These constraints are in addition to the inflation-driven increases in government costs which we face and the need to meet significant commitments that are important but unbudgeted for, such as support to the Ukrainian displaced people as far as possible – all from within a largely fixed budget.

Beyond the requirement to balance the Scottish budget, we have set ourselves the overriding priority of maximising the help we provide to those most in need.

During the summer we therefore announced that we would conduct an Emergency Budget Review to tackle the challenges facing the public finances and help support those hit hardest by the cost crisis.

It is against this background that the Government has approached the current round of pay negotiations in the public sector. As the First Minister set out to Parliament yesterday, our role in these negotiations is to maximise the support to the lowest paid as a crucial part of our response to the cost crisis.

As a result of that commitment to helping households in the face of this crisis, the enhanced pay offers that have been made to date total approximately £700 million. This includes the proposed settlement of the Local Government pay dispute, brokered by the Scottish Government last week, which required us to go further than planned and find additional savings to support a deal.

We believe this is justified as the proposed settlement will see a significant uplift in the pay rise awarded to the lowest paid – with awards in excess of 10% - while capping the increases for the highest paid at £3,000. That is a demonstration of the Scottish Government's commitment to using the pay awards as a way to support those most in need.

Now, we must resolve the fiscal implications of these additional costs.

As we have publicly set out, there is no unallocated funding available to cover these pay offers. The Scottish Budget is at the absolute limits of affordability and difficult reprioritisation is now required.

While changes to budgets will be formally set out to Parliament in detail as part of the normal Budget Revision process, in the interests of transparency, I have included as Annex A to this letter a list of savings that the government has already identified to enable us to meet our increased costs, increase help for those hit by the crisis and fund enhanced pay settlements.

For avoidance of doubt, further savings will be required to balance the budget, particularly if inflation continues to rise, and to direct maximum support to those who need it most. Any further savings that are identified during the Emergency Budget Review will be over and above those detailed here. I have committed to setting out the outcome of the EBR within two weeks of the UK fiscal event planned for later this month.

Finally, the Scottish Government does not have access to many of the levers which would provide the greatest support in this crisis such as the power to adjust VAT on fuel, taxation of windfall profits or wider regulation of the energy market.

I therefore reiterate my call to the new Chancellor that action must be taken immediately. They have reserved the most significant powers over this crisis to themselves. It is time they exercised those powers and helped families struggling to feed their children and heat their homes this winter. We will do everything we can, and we have utilised our limited powers and budgets, as set out by the First Minister within the Programme for Government to take forward a rent freeze

and moratorium on evictions to help people through the cost crisis, increase the Scottish Child Payment to £25 per week per eligible child from November, double the Fuel Insecurity Fund to £20 million and confirm rail fares will be frozen until March 2023. We will do everything we can but the UK Government must now act to end this crisis.

JOHN SWINNEY
