

## **Follow up info from evidence session on Tuesday 5 October 2021**

### **Tony Rose - Infrastructure Commission for Scotland**

The only additional point I was going to raise was in relation to the first question the Convenor asked in relation to relevant metrics and targets, that I unfortunately didn't get the opportunity to follow up on during the session.

The Commission didn't primarily focus on specific targets or metrics, as its recommendations were more action orientated. To that end the committee may want to consider whether it would be appropriate for it to review at regular intervals over the life of this Parliament, the Scottish Governments response to, and progress in implementing the Commission's recommendations.
