followed by Scottish Government Debate: Community Wealth Building – Delivering Transformation in Scotland’s Local and Regional Economies

[S6M-04580](#) Tom Arthur: Community Wealth Building – Delivering Transformation in Scotland’s Local and Regional Economies—That the Parliament recognises the huge potential of Community Wealth Building as a practical, place-based economic development model that can help transform local and regional economies to deliver a Wellbeing Economy for Scotland; agrees that Community Wealth Building can deliver more and better jobs, business growth, community-owned assets and shorter supply chains supporting net zero ambitions; welcomes the progress made by public, private and third sectors in implementing Community Wealth Building in Scotland so far; notes that the 2021 Programme for Government and recent National Strategy for Economic Transformation confirmed plans to introduce legislation on Community Wealth Building during the current Parliamentary session; believes that this provides an important opportunity to think creatively and innovatively about the interconnections and interdependencies between the economy, environment and society, and supports plans for wide engagement on this legislation.

Debate on the subject of—

[S6M-02299](#) Fergus Ewing: Scotland's Fair Share, the Potential of Solar Energy in Scotland—That the Parliament welcomes Solar Energy Scotland's policy agenda, *Scotland's fair share: Solar's role in achieving net zero in Scotland*, published in the run-up to COP26, which sets out the potential for solar energy to play a much greater role in Scotland's low-carbon energy mix; understands that Scotland has levels of solar irradiation that can be effectively captured and that, compared to other nearby countries on the same latitude, such as Denmark, Scotland is behind in

equivalent levels of solar technology deployment; considers that a number of policy matters within the control of the Scottish Government, including permitted development rights and business rates, could help the sector grow significantly; recognises what it sees as the ability of solar energy systems to work as a good companion to wind to make more effective, efficient use of the electricity grid and storage network; considers that, due to reported projections for solar to be the UK's cheapest form of energy this decade, and to have the unique capability to be deployed at all scales, solar is vital to supporting an affordable energy mix, and a just transition, and notes the calls on the Scottish Government to urgently assess the potential for a 2030 solar deployment target of a minimum of 4GW, and accompanying policy changes to embrace and enable this low-cost mature technology, to help tackle the climate emergency and provide investment and jobs in communities up and down the country, including in the Inverness and Nairn constituency.

Motions for Debate

***[S6M-04621](#) Ben Macpherson: Update on Delivery of Social Security Benefits**—That the Parliament agrees that social security is a human right and an investment in people; welcomes the introduction and delivery of 12 Scottish social security benefits in total, seven of which are new forms of support only available in Scotland, including most recently the Scottish Child Payment, Child Disability Payment and Adult Disability Payment; notes the more humane and compassionate process for applying for the Adult Disability Payment, which contrasts with the intrusive assessments often required to receive Personal Independence Payment from the UK Government; further notes the implementation of a clinically determined definition of "terminal illness" and fast-tracking of these applications for support; welcomes the introduction of indefinite awards within Scottish disability assistance, which provides the most severely disabled people with long-term financial security; looks forward to the introduction of new benefits, including Low Income Winter Heating Assistance and Scottish Carer's Assistance; notes that social security is one of the three key pillars in the national mission to tackle child poverty, and commends the extension of the Scottish Child Payment to under-16s and plans to increase it to £25 per week per child by the end of the year; welcomes the substantial financial support that these benefits provide to people, which is important at all times and particularly so now as people are impacted by the cost of living crisis in the UK, and acknowledges the Scottish Government's record investment of £3.9 billion in benefit expenditure in 2022-23, which is £360 million above that received by the UK Government, all of which will provide meaningful social security support to over one million people, including low-income families and households, disabled people and carers.

***[S6M-04580.1](#) Daniel Johnson: Community Wealth Building – Delivering Transformation in Scotland’s Local and Regional Economies**—As an amendment to motion S6M-04580 in the name of Tom Arthur (Community Wealth Building – Delivering Transformation in Scotland’s Local and Regional Economies), insert at end “; believes that the Scottish Government should provide more detail to its Community Wealth Building proposals to ensure it is embedded within a clear regional economic framework and a coherent and ambitious industrial strategy to support post-pandemic economic development and local job creation; further believes that the necessary legislative, institutional change and investment must be available to deliver the Community Wealth Building that Scotland needs and that can be translated into regional and national growth, and calls on the Scottish Government to revise all public procurement policies to ensure that Community Wealth Building is embedded at every level.”

carried out successful training of midwifery staff for the Highlands and Islands region to meet staffing demand as part of a two-year pilot in response to a specific workforce need; further understands that funding for this programme has now been moved to Edinburgh Napier University to cover the whole of Scotland; notes the view that NHS staff should be trained close to home in order to enhance recruitment and retention of staff, and further notes the call, therefore, for the Scottish Government to develop training for NHS staff at the University of the Highlands and Islands.

£150,000 grant from the National Lottery Community Fund; understands that it will use the funding to deliver a wide range of community activities to connect and improve the wellbeing of the Larkhall community; notes that the volunteer group provides social, educational and recreational opportunities to help local people take control of their lives and reduce isolation, and believes that this grant will enable this local community group to continue its fantastic work.

***[S6M-04489](#) Monica Lennon: Big Leap Skydive for MS Society UK—**That the Parliament commends the efforts of Barbie Turnbull, from Falkirk, and Toria Govan, from Bolton-le-Sands, who together have raised over £1,450 of a £860 target for MS Society UK; understands that the sisters are taking part in the Big Leap skydive event near Perth on 29 May 2022 to support research on the treatment of remitting and relapsing multiple sclerosis; applauds their efforts to raise awareness of the resource, Living Well with MS, which highlights the importance of self-management and self-care, healthy diet and exercise; appreciates that Toria must overcome her fear of heights to undertake this skydive; acknowledges the support and positivity that they have received from family, friends and colleagues while preparing for this challenge; congratulates them on their fundraising venture, and wishes them well on the day.

***[S6M-04411](#) Kenneth Gibson: Environmental Impact and Volatility of Cryptocurrencies—**That the Parliament notes reports that environmental charities, including Greenpeace, the WWF and International Animal Rescue, have recently abandoned cryptocurrency projects over climate change concerns; understands that digital currencies, such as Bitcoin, are created when high-powered computers compete against other machines to solve complex mathematical puzzles, and that this is an energy-intensive process that often relies on fossil fuels, particularly coal; further understands that Bitcoin production is estimated to generate between 22 and 22.9 million metric tons of carbon dioxide emissions a year; notes with concern that data from the University of Cambridge and the International Energy Agency reportedly shows that, at current rates, such bitcoin mining uses about the same amount of energy annually as the Netherlands did in 2019; understands that, while mining happens all over the world, it often takes place in countries with an abundance of cheap energy, such as China; considers that using renewable energy to power cryptocurrency mining would mean less availability to power homes, factories or electric vehicles; understands that so-called stablecoins, which reportedly claim to be a relatively safe haven in the highly volatile crypto market, have recently gone into free fall; considers with concern that this has sent shockwaves through the cryptocurrency markets, reportedly wiping billions off their value and causing many people across the world to lose their life savings, and urges the Scottish Government to call on the UK Government to prioritise the toughening-up of crypto regulation.

Proposals for Members' Bills

A member seeking to introduce a Member's Bill must first lodge a draft proposal, together with a consultation document (or a statement of reasons why consultation is not considered necessary). Subsequently, the member may lodge a final proposal, in broadly similar terms to the draft, accompanied by a summary of consultation responses (or the statement of reasons). The member secures the right to introduce a Bill to give effect to the proposal if the final proposal secures, within one month, the support of at least 18 other members from at least half the political parties or groups represented in the Parliamentary Bureau, and provided no statement is made that the Scottish Government is planning equivalent legislation.

All current proposals (together with associated documents) are available on the Scottish Parliament website at Proposals for Members' Bills/Session 6 Proposals:

Progress of Legislation

A list of all Bills in progress can be accessed via the Scottish Parliament website at:

<https://www.parliament.scot/bills-and-laws/bills>

For each Bill, the date of the next (or most recent) event in the Bill's passage is given. Other relevant information, e.g. about lodging amendments, is given in italics.

As soon as a Public Bill (i.e. a Government, Committee or Member's Bill) has completed Stage 1, amendments for consideration at Stage 2 may be lodged; and as soon as Stage 2 is completed, amendments for Stage 3 consideration may be lodged. The last lodging day for amendments at Stage 2 is four sitting days before the meeting at which those amendments will be considered (e.g. Wednesday for a meeting on Tuesday); at Stage 3 it is five days before. Amendments may be lodged until 4.30 pm on any sitting day, except on the last lodging day for each Stage, when the deadline is 12 noon.

A Hybrid Bill is subject to the same rules except in the case of Stage 2 where amendments for consideration may be lodged no earlier than the completion of any consideration of evidence at Stage 2.

Amendments to Private Bills are subject to different deadlines. These are set out in Rule 9A.12 of Standing Orders.

Members are advised to lodge amendments in good time before the beginning of a Stage and as early as possible during the day.

(G) = Government Bill; (M) = Member's Bill; (C) = Committee Bill; (P) = Private Bill; (H) = Hybrid Bill.
