NSS has considered the three questions raised by the Committee and suggest that the questions are aimed at provision of services to individuals within those categories, rather than as an employer of individuals within that category. As we do not deliver front line services NSS can only provide a response as an employer. We are sure that this is not what is being asked.

1. We are unable to employ individuals who are either asylum seekers or with insecure immigration status.
2. Not applicable.
3. Not applicable as we are unable to employ individuals in this category.

I appreciate this is not particularly helpful, but I don’t think we are the right type of organisation for the Committee to be targeting.

Sorry I can’t be of more assistance.

Kind regards

Louise MacLennan
