

Local Government and Communities Committee

**Consultation of the Scottish Parliament on the Scottish Government's Revised
National Outcomes**

Submission from Gail Macfarlane

I am in full agreement with these proposals.

I would also like to see a commitment by the Scottish Government to work towards ensuring that basic utilities such as electricity, gas, water and transport along with health and social care are owned and managed by the people for the benefit of the people.

Apologies if this falls out with the reams of this consultation. I am not currently in a position to give this the amount of attention I would like in order to compose a fuller more pertinent response.
